WORK EXPERIENCE

Frontend Developer

Codesinc

11/2024 - Present

Rahimyar Khan, Punjab

A software firm that specializes in web development projects and handles developer operations in a neat and efficient while ensuring precise work.

Achievements/Tasks

- Implemented efficient API integration using Fetch, Axios, and React Query, ensuring seamless data retrieval with optimized loading, error handling, and caching mechanisms.
- Developed robust frontend-backend communication, handling authentication tokens, query parameters, and real-time data updates via WebSockets and polling.
- Enhanced API security and performance by implementing debouncing, caching, state management (Redux/Zustand), and safeguarding sensitive credentials using environment variables.

PERSONAL PROJECTS

GPA Calculator (01/2025)

- A react application that uses an algorithm to calculate the gpa's of the user based on given input while using tailwind CSS as a UI framework

Get In Touch (01/2025)
